Delta Telephone Upgrades Greenbelt's Phone System

ANNAPOLIS, Md. (August 4, 2008)— DELTA TELEPHONE & CABLING INC., a leading local provider of advanced telecommunications and data services, is nearing completion of a full upgrade of the phone system for the Greenbelt, Md. police department, public works and community center. The project, which was contracted by the City government this past spring, is expected to be completed by the end of the summer.

“Upgrading Greenbelt’s city government phone network using Nortel’s latest systems means increased reliability and functionality, including more efficient conference calling,” said David Lanzi, President of Delta Telephone, which is based in Crofton, Md. He went on to add: “We do a great deal of work with local city and county governments seeking to increase the effectiveness of their municipal communications systems and to provide better service to their constituents.” The Company has previously worked with many jurisdictions in Maryland including the City of Bel Air near Baltimore, Harford County, Prince Georges County, Washington County, Anne Arundel County, and is currently in talks with Westminster in Carroll County.

Greenbelt is part of a growing number of cities that has the ability to use Voice over Internet Protocol (VoIP) and connects all of its sites with fiber optics. Whenever they make calls from one city building to another, they do so free of charge, without ever connecting to a public telephone line. Delta designed its updates to enhance and improve upon the existing systems.

Delta Telephone & Cabling and Delta Data Services provide high-quality voice, data and video communications products from industry-leading manufacturers. A leading provider of NORTEL Data products in the VA/ DC/ MD region, Delta has built a team of voice and data specialists dedicated to the highest levels of customer support. Delta offers customers the most extensive warranty plans in the industry, giving them total control over system cost and functionality.
