DELTA TELEPHONE COMPLETES EXTENSIVE UPGRADE OF CALVERT CO. HIGH SCHOOL PHONE SYSTEM

ANNAPOLIS, Md. (Dec. 9, 2008) – DELTA TELEPHONE & CABLING, Inc., a leading local provider of advanced telecommunications and data services, recently completed an extensive upgrade of the telephone network for Patuxent High School, one of the largest facilities in the Calvert County, Md. School system.

The assignment to update the school's old phone system was given by the county school board in mid August, 2008. Delta Telephone had finished work on the system by the time school started in September. The new system installed by Delta now provides callers with faster routing of calls by re-engineering the way the existing NORTEL system interfaces with the paging network. This allows for easy "one-touch" transfer to any phone, or page to any enabled phone anywhere in the school, all while helping the school board trim its telecommunications operating costs due to increased efficiency.

According to Delta's Senior Project Manager, Chris Muhly: "The people at Patuxent love the new system. It saves the office steps, time and money, and without any problems!"

"Our mission (from Calvert County Schools) was to upgrade the school's phone system in a limited amount of time," said David Lanzi, President of Delta Telephone. "In addition, the extremely complicated system had to be installed in an area where space was tight. Not only did Delta meet the deadline and install our system in the space allocated, but it was up and running without the need for extensive de-bugging. This is indicative of how Delta develops creative and effective solutions to the challenges presented to us in a timely manner, answering our customers' business needs with quality equipment and products."

Founded in 1981, Delta Telephone & Cabling and Delta Data Services provides high-quality voice, data and video communications products, design, installation, and services from industry-leading manufacturers. A leading provider of NORTEL Voice and Data products in the Washington/Baltimore region, Delta has built a team of telephony and information technology specialists dedicated to the highest levels of customer support. The team of certified technicians and engineers is on call 24 hours a day with access to equipment inventories for fast and efficient response. Delta offers customers the most extensive warranty coverages, including a Gold Star Maintenance Program, giving them total control over system cost and functionality.
