Re.: Data Cabling and System Install

Dear Mitchel:

I wanted to take a minute to send you a letter thanking you and your staff for all of their efforts to make the installation of our new phone system and paging system a huge success.

As you know, I had a lot on my plate during the construction of our new facility but Delta did a great job of taking the phone system and paging system install off of my plate and making sure everything went smooth. It was clear to me during the entire process that everyone at Delta had my best interests in mind and did whatever it took to get things done in such a way that we were 100% satisfied.

I look forward to continuing to work with your team as we move forward in our new building.

Please let everyone know how much I appreciate their efforts.

Sincerely,

John Milotte
General Manager
